McLean, VA 22102

Hello,

My name is Anchur Lee and I am grateful for the opportunity to apply for the Summer 2018 Cyber Security Internship at BAE Systems. After reviewing your job listing, I believe that I have the necessary skills and traits you are looking for.

I am currently a college student at Binghamton University studying Computer Science with a GPA of 3.48. During my previous years at Binghamton University, I worked on several personal projects alongside my assigned work. I used what I have learned about concurrency and data structures to create a online chat bot that could handle multiple requests at a time while requesting data from online servers.
