Hello,

My name is Anchu Lee and I am grateful for the opportunity to apply for the Summer 2018 Cyber Security Internship at BAE Systems. After reviewing your job listing, I believe that I have the necessary skills and traits you are looking for.

I am currently a college student at Binghamton University studying Computer Science with a GPA of 3.48. Since the beginning of my academic career, I have on the lookout for opportunities to gain experience and improve myself. Thanks to my enthusiasm, I was one of the few freshman in history to be voted into the board of officers for the Taiwanese American Student Coalition. I have also applied for various course assistant and tutoring positions within the computer science department. This semester I am the course assistant for a senior level computer science course.

I have always been interested in computer security, especially how exploits are found and how to prevent them. For many of my projects, I always take extra care with security. For one hackathon project, I made sure my Javascript web-app had proper input sanitation, SSL encryption and authentication even with a deadline of only 24 hours. In the spring semester, I will be taking Computer Networks and Computer Security so I will have a even stronger foundation of computer security by summertime.

I hope that after you review my resume, you will agree that I am a qualified and enthusiastic candidate. I will be more than happy to elaborate on any of my specific skills or experiences in the future.

Thank you for considering me as a candidate for this position, I look forward to hearing from you soon.
